

Oral text presentation

INTRO : to introduce you (quickly & effectively) to a sport / the purpose of these cars circling / has always been one of fav / long-standing interest / various competitions (especially F1) / various sources / wik pages dedicated / as well as the off website / allowed me -> precise & updated info (basic rules, circuits, teams, drivers)

GP : Calendar of races / Different countries / Number GP (18-23) / Divided 3 parts (drivers train / make the best time / the race)

TEAM : 10 teams (drivers / engineers / mechanics) / Has the right to / bring these 2 cars as high as possible / constructors (design, develop, build) -> single-seaters

DRIVERS : Hires 2 / as well as a reserve / highly qualified & are considered / integrate the world from the age

RULES : is first subject to strict technical ->spe & perf / in terms (engine, aero, weight, safety) / size limits / penalized for a few millimeters of overshoot) / governed by sporting -> race proce, qualif, penal

CHAMPIONSHIP : driver who accumulates + points / team that scores + points cars / distributed 10 drivers / team's points -> sum of their driv

SUM-UP : contains about (20 races, 10 teams -> best place, 2 drivers) according to specific rules to win (dri and const)

Introduction :

Today I'm going to summarize the basics of F1 in a few minutes to introduce you quickly and effectively to a sport that I really enjoy. So many people are surely lost and still don't understand the purpose of these cars circling around a circuit.

Formula 1 has always been one of my favourite sports because of my long-standing interest in cars and the various competitions that exist, especially F1.

For the preparation, I used various sources of information, in particular the Wikipedia pages dedicated to Formula 1 as well as the official website of the FIA (Fédération Internationale de l'Automobile). These resources allowed me to get precise and updated information on the basic rules of Formula 1, the circuits, the teams, the drivers, and more)

Main body :

Formula 1 is the most prestigious and popular motor racing championship in the world. We will discuss the elements that make up this championship.

GP :

Formula One consists of a calendar of races called "Grand Prix" that take place in different countries around the world. The number of Grands Prix can vary each season, but in general, there are between 18 and 22 races per season.

These race weekends are divided into 3 parts: free practice where the drivers train, qualifying where the goal is to make the best time that will define the starting place in the 3rd part, the race.

TEAM :

10 teams are present in Formula 1 with their team of drivers, engineers, mechanics, and other personnel.

Each team has the right to 2 cars on the track. Their goal is to bring these 2 cars as high as possible in the race ranking.

Formula 1 teams are also considered constructors, as they design, develop and build their own racing cars, also known as single-seaters.

DIVERS :

Each team hires two drivers to represent their team at Grand Prix events as well as a reserve driver whose purpose is to replace one of the drivers if needed. They are highly qualified professionals and are considered the best racing drivers in the world. For the most part, they integrate the world of the automobile from the age of 7 years

RULES :

Formula 1 is subject to strict technical regulations that define the specifications and performance of race cars, particularly in terms of engine, aerodynamics, weight and safety. For example, each part of the car is subject to size limits and can be penalized for a few millimeters of overshoot. Formula 1 is also governed by sporting rules that define race procedures, qualifying, penalties and other aspects of the competition.

CHAMPIONSHIP :

Formula 1 actually has two championships each year: the drivers' championship, which is won by the driver who accumulates the most points during the season, and the constructors' championship, which is won by the team that scores the most points with its cars. The points are distributed to the top 10 drivers in each race and the team's points are the sum of the points of their driver.

Sum up :

Now you know that each season of F1, contains about twenty races, where 10 teams fight for the best place with their 2 drivers according to specific rules to win the drivers and constructors championships
